SPUNFABTM
Non Woven Pvt. Ltd.

100% polypropylene, UV resistant specially designed for crop protection.

Our crop cover fabrics help to extend the growing season resulting in higher yield crops. They are particularly essential in climatic conditions that do not favor successful continuous crop development. They create a micro climate by keeping soil temperatures higher than environment temperature, thus helping plants to grow faster.

Features:

- Protect plants from frost, snow, hail, strong wind and insects
- Allow earlier plantation – increase crop cycles per season, crop yields and profits reduce Moisture loss through the soil
- Reduce the risk of pollination
- Allow water, air and nutrients to penetrate
- Reduce the need for insecticides and chemical treatment
- Light- weighted so as not to prevent plant growth
